

Base paper and problem setup

Presentation 4 | 16-17 November 2026

Student template

- Base paper and motivation
- What is already solved?
- Input and output
- Dataset and preprocessing

Research question and tentative timeline

Presentation 4 | 16-17 November 2026

Student template

- What problem are you asking?
- Scope, assumptions, and expected contribution
- Tentative deliverables and dates

Presentation 2 summary

Presentation 4 | 16-17 November 2026

Student template

- Attempts made and reasons for them
- Results, failures, and lessons learned
- Updated timeline

Presentation 3 summary

Presentation 4 | 16-17 November 2026

Student template

- Current method and results
- Updates, limitations, and remaining work

Final results

Presentation 4 | 16-17 November 2026

Student template

- Main results and comparisons
- Figures, tables, and key observations

Method and implementation

Presentation 4 | 16-17 November 2026

Student template

- Final method and design choices
- Implementation and reproducibility details

Analysis

Presentation 4 | 16-17 November 2026

Student template

- Error analysis and interpretation
- Ablation, comparison, or robustness analysis

Limitations

Presentation 4 | 16-17 November 2026

Student template

- Limitations and practical considerations
- What the results do not establish

Conclusion

Presentation 4 | 16-17 November 2026

Student template

- Answer to the research question
- Main contribution and takeaways

Final checklist

Presentation 4 | 16-17 November 2026

Student template

- Explain every figure and result
- Be ready for viva questions
- Final report: 2 pages
